SENIOR ALUMINIUM SYSTEMS

Auto Doors & Shopfronts UK Ltd

ADSF UK provides its customers and their clients with a wide range of high performance aluminium glazing systems.

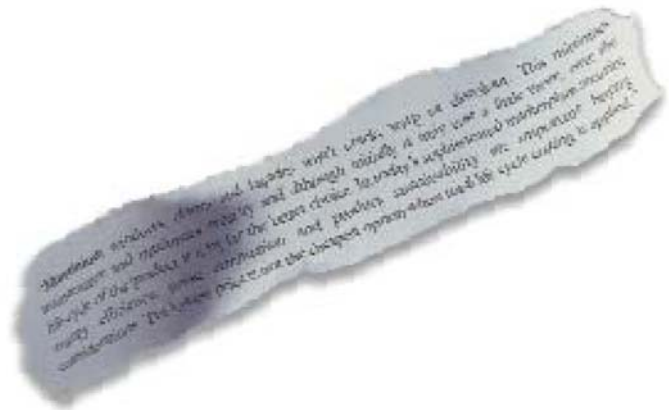

ADSF UK strives to provide the highest attainable level of customer service.

Continuous growth has seen the company become a major manufacturer of aluminium entrances throughout the UK and Ireland.

Auto Doors and Shopfronts is dedicated to providing a highly personal service to match the requirements of each customer, ensuring that the right material is available at the right time resulting in a successful outcome of each contract undertaken, irrespective of size or value.

An on-going system of product development and review, driven by continuous feedback from customers, has resulted in a highly market orientated range of products encompassing entrances, doors, ground floor systems, windows, patent glazing and advanced curtain walling.

“ADSF has grown nationally . . .”

Aluminium profile sections are supplied to Auto Doors and Shopfronts UK through Senior Aluminium Systems

THE MERCHANT STORES

GROUND FLOOR

ADSF Ground Floor Systems

ADSF Ground Floor Systems

ADSF Ground Floor Systems have been developed to give building designers the maximum aesthetic opportunity with minimum complexity. Utilised by high street names throughout the UK, ADSF Ground Floor treatments are reliable, attractive, safe and easy-to-fix.

A product of continuous development, the systems cater for a wide range of requirements from simple single glazed shop fronts to complex double glazed ground floor treatments for large retail and commercial developments.

All profiles accept glass and infill panels from 6mm to 24mm which may be either bead or pocket glazed. Gasketed glazing ensures minimum in-service maintenance.

ADSF Ground Floor Systems are fully compatible with ADSF Door Systems to ensure that fixed and entrance glazing can be integrated into a single uniform façade.

Curtain Wall Systems

Curtain Wall

In response to the industry wide call for reliability in curtain wall installations ADSF offers two products, both in 28mm glazing and tested to the highest industry standards, offering the building designer proven, cost effective solutions.

SCW is a box and plate system enabling modular construction in the fabricators premises thereby monitoring quality and speeding up site erection. With a 50mm wide profile, the system offers a wide range of mullions to cater for differing structural conditions and a wide range of external caps to vary the finished appearance. Complementary sections for sloped glazing are available.

When tested in accordance with BS 5368: Parts 1, 2 and 3 the product achieved the following classification for weather resistance as defined in BS 6375: 1989.

Air permeability = 600Pa

Water tightness = 600Pa

Wind resistance = 2400Pa

SMR 900 is a stick assembly product utilising tubular profiles for additional strength in large span applications and is sealed internally and externally with EPDM frame gaskets with vulcanised corner joints in compliance with BS 4255. The system has been tested in accordance with BS 5368: Parts 1, 2 and 3 and also to the requirements of the Centre for Window and Cladding Technology.

Improvements

ADSF products are constantly improved. As a consequence, technical data as listed in this leaflet are not to be considered binding. Further information can be found in our technical manuals, available on the website www.adsf.co.uk
